SUBJECT INDEX

ABS, p. 14
Alkaline metal ions, p. 357
ASTM D09.21.70, pp. 109, 134, 155, 175, 196
ASTM E05.21.70 test protocol, pp. 109, 134, 155, 175, 196
Atrium fires, p. 516
Brominated phosphates, pp. 257, 551
Bushfire, p. 499
Carbonaceous fibers, p. 238
Casuarina needles, p. 499
Cellulose sample, p. 424
Cellulosic smoldering, p. 357
Char, p. 357
  development, p. 551
  phosphorous in, p. 551
  porosity, p. 551
  SEM, p. 551
  strength, p. 551
CNET, pp. 109, 134, 155, 175, 196
Combustion, pp. 109, 134, 155, 175, 196, 329
  droplet, p. 44
  flaming, p. 442
  forced convection in, p. 44
  forest materials, p. 442
  gases, toxicity of, p. 63
  liquid fuel, p. 44
  modeling, p. 44
  smouldering, p. 442
  waves, p. 499
Composite materials, p. 329
Cone calorimeter, pp. 14, 424
Corrosivity, pp. 109, 134, 155, 175, 196
  copper resistance change, pp. 109, 134, 155, 175, 196
  metal loss, pp. 109, 134, 155, 175, 196
  polymeric materials, pp. 109, 134, 155, 175, 196
  smoke, pp. 109, 134, 155, 175, 196
  test methods, pp. 109, 134, 155, 175, 196
DIN 53436 tube furnace, p. 63
DIN 57472 acid gas test, pp. 109, 134, 155, 175, 196
Elastomers, p. 246
Electrical cables, pp. 329, 506
  cable composite, p. 506
  insulated wire, p. 506
  oxygen index test on, p. 506
Environmental weathering, p. 452
Fabric
  alkali-metal content, pp. 268, 284
  aqueous rinsing, p. 268
  basis weight, p. 268
  burn promoters, p. 268
  cellulosic content, pp. 268, 284
  cigarette ignition source, pp. 268, 284
  composition, p. 268
  cotton, p. 284
  ignitability, pp. 268, 284
  permeability, p. 268
  polyurethane foam, p. 284
  potassium content, p. 268
  smoldering, p. 284
  sodium content, p. 268
  upholstery, pp. 268, 284
  weight, p. 284
Fire
  effluents, p. 63
  flashover, p. 14
  modeling, p. 313
  parameters, p. 14
  propagation, p. 329
  zone models, p. 516
Flame front, p. 499
Flame retardance, pp. 257, 388, 551
  bromine, pp. 257, 388, 551
  char studies, p. 551
  cotton, p. 3
  elastomers, p. 246
  engineering plastics, p. 257
  fabrics, p. 3
  gloves, p. 246

SUBJECT INDEX

ABS, p. 14
Alkaline metal ions, p. 357
ASTM D09.21.70, pp. 109, 134, 155, 175, 196
ASTM E05.21.70 test protocol, pp. 109, 134, 155, 175, 196
Atrium fires, p. 516
Brominated phosphates, pp. 257, 551
Bushfire, p. 499
Carbonaceous fibers, p. 238
Casuarina needles, p. 499
Cellulose sample, p. 424
Cellulosic smoldering, p. 357
Char, p. 357
  development, p. 551
  phosphorous in, p. 551
  porosity, p. 551
  SEM, p. 551

DIN 57472 acid gas test, pp. 109, 134, 155, 175, 196
Elastomers, p. 246
Electrical cables, pp. 329, 506
  cable composite, p. 506
  insulated wire, p. 506
  oxygen index test on, p. 506
Environmental weathering, p. 452
Fabric
  alkali-metal content, pp. 268, 284
  aqueous rinsing, p. 268
  basis weight, p. 268
  burn promoters, p. 268
  cellulosic content, pp. 268, 284
  cigarette ignition source, pp. 268, 284
  composition, p. 268
  cotton, p. 284
  ignitability, pp. 268, 284
  permeability, p. 268
  polyurethane foam, p. 284
  potassium content, p. 268
  smoldering, p. 284
  sodium content, p. 268
  upholstery, pp. 268, 284
  weight, p. 284
Fire
  effluents, p. 63
  flashover, p. 14
  modeling, p. 313
  parameters, p. 14
  propagation, p. 329
  zone models, p. 516
Flame front, p. 499
Flame retardance, pp. 257, 388, 551
  bromine, pp. 257, 388, 551
  char studies, p. 551
  cotton, p. 3
  elastomers, p. 246
  engineering plastics, p. 257
  fabrics, p. 3
  gloves, p. 246

HPLC, p. 3
NMR, p. 3
phosphorous, pp. 257, 388, 551
polycarbonate/ABS blend, p. 388
polycarbonate/PBS blend, p. 388
polycarbonate/PET blend, pp. 257, 388
reactive, p. 3
synergy, pp. 257, 388, 551
Flame spread, p. 329
Flashover, p. 14
Flow fields, p. 481
Forest fire, p. 502
heat source, p. 502
hot spot, p. 502
ignition, p. 502
vegetation, p. 502
Free convection, p. 481
GC-MS, p. 376
Gloves, p. 246
butyl rubber, p. 246
chemical protection, p. 246
chemical resistance, p. 246
flame retardance, p. 246
HPLC, p. 3
Hydraulic fluids, pp. 376, 411
Hydrolytic degradation, p. 452
Inhalation toxicity, p. 411
Ion-catalyzed smoldering, p. 357
Laser velocimetry, p. 481
NMR, p. 3
Oxygen index test, p. 506
Phosphorous-bromine synergy, pp. 257, 388, 551
Phosphorous compounds, p. 3
pkRHR/TTI, p. 14
PMMA, p. 424
Polycarbonate, pp. 14, 452
Polyphenylene oxide, p. 529
Polystyrene, pp. 14, 529
Polyurethane foam, pp. 63, 284
Pyrolysis, p. 424
PYROVATEX CP, p. 3
Radiation absorption, p. 424
Smoke, pp. 109, 134, 155, 175, 196
control, p. 516
measurement of, p. 313
obscuration model, p. 313
optical density, p. 313
release rate, p. 313
soot yield, p. 313
yield, p. 313
Smolder promoters, p. 357
Surface degradation, p. 452
Thermal conductivity, p. 424
Thermal degradation, pp. 376, 411
Thermal insulation p. 238
Thermal protective performance, p. 238
Thermal transmittance, p. 238
Time to ignition (TTI), p. 14
Total heat release (THR), p. 14
Triaryl phosphate, p. 529
Upholstery fabric, pp. 268, 284
Urethane, p. 14
UV-degradation, p. 452
Zinc borate, p. 529
Zone model validation, p. 313
